**DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 2 and 6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

3. Claim 2 recites the limitation "the inner central portion". There is insufficient antecedent basis for this limitation in the claim.

4. Claim 6 recites the limitation "said central portion". There is insufficient antecedent basis for this limitation in the claim.

***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

6. Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by MacAdam et al (US. Pat. No. 6,631,722).

MacAdam discloses all that is recited in the claims (see figures).

7. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Smith et al (US. Pat. No. 6,041,790).

Smith et al discloses all that is recited in the claim (see fig. 6)

***Claim Rejections - 35 USC § 103***

8. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

9. Claims 1-8, 10-12, 15-29, 31-32, 35-44 and 46 are rejected under 35 U.S.C. 103(a) as being unpatentable over Berger et al (US. Pat. No. 3,599,646) in view of Marmo et al (US. Pat. No. 4,311,720).

Berger et al discloses nearly all that is recited in the claims, except it may not specifically state that at least one breakable capsule is disposed in the cavity (see entire document). However, Berger et al does state that materials for flavoring smoke may be provided in the cavity (see col. 1, lines 54-58). Further, Marmo et al discloses a means to flavor tobacco smoke comprising gelatin, flavor-filled capsules (which obviously can be considered to be "breakable") that have the claimed characteristics. Therefore, it would have been obvious to one having ordinary skill in the art at the time of the invention to incorporate the flavoring means of Marmo et al into the filter cavity of Berger et al since the flavor capsules of Marmo et al provide for instantaneous evenly distributed flavor release during smoking activity (see col. 4, lines 40-52).

Regarding claims 11-12, 31-32, 42-43, and 46, while Berger et al modified by Marmo et al may not specifically state that a diluting agent is used, with the flavorant, and said agent is a medium chain triglyceride, it would have been obvious to one having ordinary skill in the art at the time of the invention to provide for a diluting agent, in the form of such a triglyceride mixture, since this type of oily substance is capable of readily dissolving hydrophobic flavorants, is excellent in oxidation stability and is easy to handle due to its low viscosity, which would allow for a more homogenous mixture to be used in the flavor-contained gel of the combined references.

***Allowable Subject Matter***

10. Claims 9, 13-14, 30, 33-34, and 45 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
